EX: KA1BIQ

Station W9YT Confirming

Our SSB QSO of 11-22-92 1990

At 1604 GMT

Your RST was 59

On Frequency 21.38

My rig is a Galaxy V MK II, running somewhere between Ø and 200 watts, depending on my mood, to a multi-band half wave dipole up about 30 feet, give or take a few feet. The entire station sits in a spare closet, due to the XYL.

GOOD LUCK CQSS

73, B

☒ Please QSL Thanks for QSL ☐

This QSL card is custom designed using AutoCad on a Compaq 386/20 with a Hewlett-Packard DraftMaster I by N4XJX
